

6/7/26.

5-26-2026 Tuesday Notes of Ed Sparks

Woke up at 5:45AM. Smoked 2 cigarettes. Daylight was enough to rest. I went to walk Salinas like normal. Made it to end street sign for 16 Grease Lightnings and leg kicks. Saw normals and shortee far away but left any way.

-

Negotiations on yesterdays march to Khartoum through Syria from Rome started with showers ???(provided as courtesy to Bedouin)???. Shower rest areas would be explained by me in 8 minutes with visitors observing.

A block step and staggered goal post laundry area with 1 raise(d) post, seat, rock can serve as an emergency communication (put a sheet or clothes on it(same with side of street)(same with outpost lookout for no cell contingency)). Plus staggered laundry has protection from bullets (no it doesn't? If the blocks were poured concrete, yes it does.).

Went through card playing and battery storage/plus sun recharges them also. Car battery too/ paint too. Then used cards for thinking time of different sizes for Men/women.

Then explained sand on table helps with writing, and more stable to make maps with anything avail. (cards stand better) Have to protect food. Sand on boxes on table helps with stability in wind small box a cup table next to you needs sand for cup butt gets in food.

Pencil strategy. Lefty Righty making with crossed I's in different directions to get to 1st crossed out in different directions to get a V for 5 and writing Vs too close gets to X for 10 to teach numerals.

I did explain to Feds via Email on my ping CMP prompt to auto reply LAT LONG or we're comin' in stages. We can ping continuously. They do search E&O+T to find Moogles uses military

5-26-2026 Tuesday Punch-List of Ed Sparks

168. 5/26/26 6PM chair move to corner. Male move around a few times. Assessment coupon or position for the effort (of spying maybe). Take a bite. Taste the rainbow.
- 169A. The email to Cyber USA. The DBA of military bases to hid Elephant People, Travelers in "No Zones" both as indentured servants. Please access purchases of DBAs in ground leases *All. Thank you. E&O+T.

*That includes Air Rights and Ground Rights too. Because if you're an IT person than you may read that wrongly instead of right on the money hunny bunny.

*You may want to change all of the names on your RENAME in front to Omar's Beds or something else. You may find them that way.

The Moogles towers/antennas don't hid anything from EWE but they do put the example to the test for your FUTURES.

Let's Look. The downward Tree named Everyone's Equal.

Everyone's Equal see : 90k of My businesses and 90M of your businesses.

I charge everyone if I work or if I benefit from Moogles , then I have to pay OR what will happen is...

then I answer the phone/email for you with Should I sell this? And give you a credit of .59 by the way, I have to charge you for the personnel hourly too but they I captured by commission onlys pay to use this numbers in a marketplace and sell as leads to media purchasers.

See I do this to myself too. So everyone is on the same

base DBAs to hide towers. May be here too. I did use Equatoro/Ecuador/Ececutor Princess statement.

If I am talking to someone about WINDOWS KEY+R, type CMD press enter, type ipconfig /all || /release || /renew press enter, ping cia.gov -t press enter,

I would have to seriously be patient.

You would receive only 1 piece of usable informations for your location which is IPv6 first.

This is because this process has not been fixed by IT to display LAT LONG in the results.

If you read IPv6 to me with no internet browser, I would have to use the IPv6 to put into Moogles with location ____?

That's great except for IPv6 looks like this when reading over the phone:

IPv6 Address. :
2800:bf0:a806:6a:c097:da72:db2:528d(Preferred)

Okay, well our geniuses at IT basement near you should just be able to add a Print Line and update the process to include LAT LONG under that statement. Just as many numbers but easier for trapped individuals in a locked room. So I asked the IT USA via their communication avenues to, fix IT! Just do IT. Instead of watching in a sitting position.

—

If you do get sloppy with your Roman numerals, then you may shrink to 1 strike instead of 4 strike. A bunch of those lefty righty may make a V by themselves. Write too many Vs may make an X by themselves. Simple sand writing on a table.

playing field except I own the credit card machine company, bank and don't pay any labor because I have computer peoples too.

Everyone's Equal see: Everyone's Equal see : 900k of My businesses and 89.1M of your businesses.

Everyone's Equal see: Everyone's Equal see : 9M of My businesses and 81M of your businesses.

Everyone's Equal see: Everyone's Equal see : 19M of My businesses and 71M of your businesses.

Everyone's Equal see: Everyone's Equal see : 190M of My businesses and 5 of your businesses.

Remembers: Los Angeles is large. So seeing an indiannation as your doctor/lawyer/dentist/computer would just be an average use of me answering your phone by flying someone over there.

Thank you for your time currency today.

Which is close to what I sent them at Cyber USA. That's why I have Siberman so I know 1 is infrastructure Level 2 and Cyber is infrastructure Level 3. IT does not mean there is no such things as Cyber but IT does mean that Level 1 is something other than the government if the government doesn't own the antenna, line, coord, router, or otherwise.

Why does Cpanel Godaddy go direct to a Moogles line instead of a government regulated and observed line... ? Because that's how I pause what's going on and see if I want to answer OR do the work OR sell it after I cannot do the work back to the person who it belongs to OR just let it go through and send them all advertisements that I can make money off of later. Moogles has millions of staffs with computer peoples too for EWE and your paychecks.

Rest areas were harder in a volatile situation, but even more crazy in a separated society requirement Voluntarily / Mandatory to have per some local state laws abroad. Seems normal but more distant than each other.

-
I did explain last night that shortee and white girl ghost ship were 1000 years old very dangerous wifees. Better they're close. They're in ZM and ZH (others may be too)

-2 page

Worked as hard as I could between breaks to finish 5/18/26 in notes. Some close. Ate steak broccolina & papas mash for lunch with chimmichuri jar Lisseth cut my steak. Finished work at about 3:15pm and listened to my 3 songs. I did get paid and paid \$500 of my loans. I have a 2-day outstanding invoice. Taking nap shortly. 4:09PM.

-
I did put the clean a fork strategy into the rest area. With well and aqueduct option for a hand with lever to open and rake heads added later for bags to shower with as shower heads. <I had to make the shower area publicly not interesting. Australian bush use a bag to fill up and poke holes in it.> Bathrooms are back there. Sex segregated rest areas. Staggered or both sides or same side some some. I did prove with chair & chairs behind with Romans that my wife does not understand true English. <stand up, turn around, sit down. This alleviates any issues with distrust and trust.> Sit stand turn around other way take chair and sit. She did walk with women for cooking observance /cleaning with local products. <If Khartoum we go, locals we know. No trash upon return see trash.>

-
Our envoy to Rome to Sudan requires supplies, cavalry turned political public relations wants complete military with buses to rest RVs for sleep/progress <Japanese sleeping tubes were purchased in

I did sent this exact same reasoning to the ICJ of course against Zuckerberg doing the same thing on all META platforms. You can't tell me with one of the larger linkedins facebook business profiles etc that I haven't got a comment like or regular whatsapp conversations from hundreds of requests and ads posted on 36-100s of avenues for free products.

Remember everyone is paying but not everyone is paying. You'll find out if you use a free product long enough that they don't have to guarantee that IT works... see I do IT to myself.

a semi trailer fashion>. Horse and foot more fun/traditional for HRE. I am okay with all of it for rests and schedule swaps.

Supplies super cool fun package for Syria includes large crates on pallets with plastic tub outside boxes inside. We take our trash. Thinking table may remember things in boxes like packing popcorn are still there. I demonstrated the tubs empty are sex segregated pools. Sun dried 1 day for cleaning.

Liseth did demonstrate female hygiene products of 0 interest if looked to that group over there. I did bring many sizes of cards butt poker table shuffler and laminated game instructions with cartoon instruction & number of players on outside. In our packet of things agreed on publicly were slid Arms available by photo carried with us. Many shufflers men & women batteries.

**

I did foresee Matt Daeman being called during a 5 horse blockade by Bedouin. If I walked out there, I want full photo instructions that trucks = jobs for men with give money to women with women give money to kids and men have empty pockets... to return back to trucks.

I did figure to table out with snacks. I did want a large amount of umbrellas so I could grab a couple on the walk, take away bag, Polaroid for now photos with me driver side of truck, Film, solar battery charger, simple digital camera, solar plug outlet, mini photo printer with paper, and some kites.

1 person will not stand in the road, but may flag things down from side of road. Mostly for more Polaroid film as each had 3 photos to take home. Photos would mostly be for disease problems or water issues in my mind solvable by now for any government authority contact.

**

-page 3

was told no food preferred. Not from similar marches with me in the past. No same song over and over again. Better to water fast than cooking station we brought lunchables for pow wow. I did eat sand (during demonstration).

The “our garbage” bins have latches and tops for trash access. Semis will pick them up. I did accidentally bring Root Beer and Ice Cream before comments. Bacon too. Eggs scrambled etc. I did bring wardrobe options & hot showers for them too/only with local hygiene options for their smells. Arab <Ottoman reference I did not write correctly> garb Moor garb. Fishermen neck protectors from sun covers mouth during presentation so I don't see them chatting or translators. Added touch pencils in tied bandanna instructions to self. Pocket knife I prefer Yellow Gerber. Asked units who can sharpen on rock or knife fast. Hawks Eagles Birds Chariots. Have a session on rotating mom dad eggs by number. Let fly away and keep 1 maybe. What they eat also include. All in context with email request to the Lecce Cavalry.

-

Egypt banner Khartoum may be illegal to write in Arabic. We are only going to look at it from afar and return to Cairo and further. I may still flop it. (Khartoum). Past contracts Ottoman would say otherwise. We'll have to read 'em. Depends what the ground feels like. Serbia of the blacks.

-

Everyone we all agree he always does it the same way. “We're lost and somewhere near the border of India with a full army?” What a great trip home!

-

Woke up from non-nap to Lisseth going to church at 6PM by bus at 6:30pm-7:30pm return 7:40pm. I went to beach. Sat in front to block mind and entered into conversation about No Sunglasses. I also said Barbara was the definition of Family in satire jokes. This went into a let down for the computer people. After a while, I apologized...

-4 page

and they researched enough of Barbara to underestimate the butt of jokes involving the word family. They or some some went to Khartoum by camera and were not innocent as much. A debate on FreeTime VS Work definition I would say work/free time if they need the hours.

I walked the beach, moved my chair a few times. The weather was cold, water swim cold. Saw male observing my different spots. Left because I don't belong there.

-

Ate spaghetti Lisbeth is beautiful. She put on a little make up time and walks around in her hotter bra and panties to not argue about church visits OR her power hour. She returned. I woke up at exactly 0:24 on 5/27/26.
