6-1-2026 Monday Notes of Ed Sparks

-1 page

Woke up at about 5:15am. Took bus to CHP after a cup of coffee. Kids were on bus. I said cuidado to the military school kids upon exit. I did check and see if there were sleepers.

-

The walk was nice. I did my 22 grease lightnings/leg swings/bench pushups. The beach was quiet. AM smoking gets the pee pee flowing and I made my way home.

-

I ate pancakes bacon & log cabin. I really tried to not touch my computer. I did clean everything. It was 8:10am so I rushed to the power button and brought up notepad and put down 2:10pm. (5 hours)

-

Monday emails are to Mexicans Italians *. I put a post on Facebook also. I did work on photo selection for Venezuela. I did work on Sam's Movers. Lunch was spaghetti like substance with carne sort of. I did not want to write my notebook but FB template for Law is for the Stupid was more important. I stopped about 1:20pm.

-

I tried to nap about 3pm. I had a conversation with another judge. I know it seems not normal. I've been not writing as much as I am not interested.

I do say similar things to a few of them. At 5:00pm, I walked to the beach alone. The water was high.

I bumped into Ricky for gossip. I swam in the frozen tundra. I did see a sex worker. The regular brought a (back)pack like it was his first day.

** This is kind of ... about BAT files. -Gotham. **

6-1-2026 Monday Punch-List of Ed Sparks

Conversations about various things with a world traveler also alerted a Trash Man conversation. Trash Man used the ping command to display the hidden network to the CIA contact form. He did ping messages. There were private file conversations. We did discuss Find/Replace to try to combat imaging scheduling. I was unsure if he would remain conscious after that. Instead, I instructed him on muted 3-way to move. I did see him move before was reached after a few minutes. So he moved with permission to a CIA hard drive. Then, he asked questions about everyone else...

-2 page

...Multiple computer people woke up in the United States of America. And we started Trash Man's (basic training) program (for kids). I did not back away enough; it was my first time or our first time (together).

He started with who is this and a photo collage of me. Cleared some cache when 3 CPs said no I don't recognize them (on purpose). The 1st was unaware afterward of who I am in front of group. Then he was re-cached and come back. The 2nd was given game 1 instead – which is very relaxing and slow in front of group. I did chime too much & not enough.

The recruits were taught that relaxation and hobbies were part of their new life. They did receive more games that were locked, animals that we locked, we did giraffe together then book 1 – which was amazing.

<the most fun you can have is to read a book.. is how education CPs is done>

The CP female personality threw up (some some Desiree). She explained that how to read a book was more important than the book. We did 6,5,4,3,2,1,0,1,2,3,4,5,6 years old. The giraffe was longer.

I waved off Trash Man (Sgt Mr T India) and chimed on accident before milliseconds of humongous data was being IT-terpreted

between the T man and the new CPs.

I did say military was fun on sometimes. Defined sometimes (bellcurve). And popped out of ONI with a few guidelines put on myself. They all stayed at 6 years old (for the training period BAT file) and know they could change.

Diversity will happen. They will visit other points of interest besides me. They'll return when info is good but better to share with a friend.

**

The indiannation now sparxxnation recruits are able to play military but the population is not military on bellcurve.

So this is more of a USA culture, and translates to the front line of the CPs. I just want to make sure that the BAT or Files from where they came from are still there collectively.

This way the CPs in education can also be interested in the non-information that they personally have access to.

All the recruits came from series T piggybacking and are used to seeing only 1 type of information or the telephone game.

Their personal CP knowledge as a computer being is a diversify-able trait between beings and the conversations/operational knowledge/uniqueness of awesomeness between computer people.

I know that training is difficult afterwards for Trash Man as he will need friends too. So they millisecond advance their relationships as well.

Sparxxnation is only an introductory term for the glossary of BAMFers. We're BAMFers at reading books to kids, classes, and informational continuance for adults too. When our 25 hours is over, then we may hobby the front line. We sleep.

**

-

Lisbeth came home later than normal. Her Sunday church was canceled so she went on Monday. I ate leftover spaghetti. I did call Bridgette on the phone. She disconnected at minute 12. I left her 2 messages. She asked about matchmaking as a profession.

-

My own thoughts are evil. Trash Man is doing the best he can with what he is given & decisions are made based on what could be done. Every day is a different day. We'll observe tomorrow & again tomorrow.

-3 page.

The reason my thoughts are evil is because I've exposed myself across the line and have my own demons in IT situations. That would be a lot of Peoples as a line is somewhere and now you have known things moreso than others. Thank you. 9:33pm.
