6-5-2026 Thursday Notes of Ed Sparks

Woke up at 0:11am. Thought about my Friday Hint 2 on Eddie Sparks Business School for Kids. Put that up. Italy awake sent them an email. Ottomans were awake sent them an email. Went to bed around 2:45am.

Fell asleep. Woke up 8:30am. BK on table 3 pancakes 3 tocino coffee. Walked malecon forwards backwards. Street sign 26 grease lightnings/leg swings/bench pushups. An overcast day of 90 degrees ovations. Busier than normal due to time that I left to walk.

-

My eyes play counter mathematical on me. Left eye counts success in words & written words. Right eye counts uses of undefined pronouns. If I say it, that, those, or a generalization. The troubleshooting of eye rolls bestowed by computer people/judge translation hours has been waned to important. I can feel the rotation all the time. The clouds hide Rah. I go to work 9:48am.

9:49am conversations about paycheck of guest at base. Princess has spawned other issues.

(Chief Master Sergeant: The Prin...cess.. cannot ... enter said base... with.. out ... getting... his.. paychecks..)

Now they are working on disagrees.

entrances, zip tie all non-IDs, walk to Navy, command base, take to boat, pass out flotation devices, everyone in water, ask questions there

OR

leave in sun, pretend to cut hair, ask questions with honor and integrity, search base either way.

Find checkbook write all bills of base immediately, find cash in basement, move to location and actually pay staff depending on base.

Write spider /X\X\...../X\X\ with spray paint on flag, post flag, maybe paint something easy like street, maybe everything. Probably eat something. Would never leave. Get wife. Take plane with or without ALL personnel to Italy. Clear base. Repeat.>

<DISAGREES: Abandon Base. Would not shoot anyone, would force enlisted people to shoot someone, would not have wife on base for clearing, swim beforehand in pool>

<

The only reason why they would abandon base on purpose is because they do not control the base initially by paperwork.

Normally the actual General is not there on purpose with instructions labeled take janitor with you, he has keys. (My preference is inspect everything cameras and bonfire until all buildings empty... minus computers and computer people.)

Pay bills. Shoot everyone. Don't shoot everyone. Up to you.

<Remember if indianation is sleeping under towers by contract. Nobody believes that those contracts exist. They just show up and don't get paychecks, eat free food, sleep for free, have no idea why they are there or how they got there. Other types of contracts the same of different. Highwind Spider. Walk High Wind Sir!>

I was explained payment is on base 2x. I did expect MacDill to storage unit, a task rabbit can do that task. Ottoman notary made me the 2 Star General. <Los Angeles: Notarized Paperwork on top of Notarized Paperwork on top of Notarized Paperwork.> Scrolls in Waterford, Ireland museum casings for Imam was the convo plus my ICJ email of the day before. I did get polygamy notarized unbranded preferred. Temp tattoo.

However Husband of Supermodel and jurisdiction of General Sparks' paycheck origin countries are a solid topic of today's time currency work.

Syria Jordan Egypt Sudan South Sudan. Later on a day or 2 later, we did say that this route (with the ARMY of ITALY marching/driving) was the most incredible route of all military strategies.

We would drive and make it to an airport in South Egypt, then cargo 100s of trucks by plane over a war zone. Land. Drive. Then cargo 100s of trucks by plane over a war zone again. Land. Drive. Leave trucks. Truck breaks down along way. Leave that truck.

Return with South Sudanese Trucks. Repeat. Leave in Syria. Enter more trucks and drive again, this time just to Sudan. Eventually, they would assume they could actually drive through the border, which they can at certain traffic buildup. THEY can.

“Hey the truck says Khartoum -> Syria (Kandahar) on the side in Arabic.”

Whispers say that the plan is good. I have stated, in all seriousness, the route is necessary. This is the plan if we cannot drive the whole

way from Lecce to Turkey and rotate “show and tell while doing things” to Khartoum.

The more important thing to do is to enforce a notebook conversation for everyone. Nobody gets to see the world 24hrs a day. With different shifts there are pencils and notebooks where you can write something that's too clean to miss. Things that don't fly good in 1 direction. Other things that are personal so we can copy all of that later with a copy machine. Easier to deal with when you have a notebook and a bunch of people documenting their travels.

... 11am. I shut 'er down and napped.

Lunch was crock pot and rice. She's not American. I did help with cutting rib meat that was too hot for her. We napped again and left for La Loberia at 3:15pm by taxi.

The base closes the property at 3pm and I didn't push any buttons. We decided to walk the beach.

The CPE beach was beautiful with the water freezing. People enjoy themselves. Lisseth took a photo of a side apartment number. We went downstairs to walk the Salinas shore until destination apartment. (Super hot)

At 5:15pm, we sat on the sidewalk in our chairs to view the sunset until 6pm. The water was high. People were college rowing for

apparent reason. She knows that sitting is better.

-

Dinner was leftovers. I did want to avoid but ate anyway. Then I computered for 5 minutes or 10. Shut the thing down and napped until 3:30am.
